APPLICANT'S RESPONSE TO EXAMINER'S REASONS FOR ALLOWANCE

Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450

Sir:

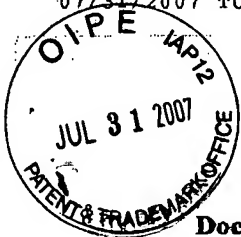

The Examiner's Reasons for Allowance includes paragraphs (i) - (iv) that roughly correspond with Applicant's Independent claims 1, 16, 17 and 26. However, there is no analogous paragraph for independent claim 27, that includes a different combination of elements from the remaining independent claims. In addition, paragraph (iv) differs from claim 26. Claim 26 indicates a first surface alignment on an inner surface of said first cell wall induces adjacent molecules of said liquid crystal material to adopt a first orientation, and a second surface alignment on an inner surface of said second cell wall induces adjacent molecules of said liquid crystal material to adopt a second orientation which has different optical properties from said first orientation. In contrast, paragraph (iv) replaces "first orientation" with --planar alignment-- and "second orientation" with --stable hemotropic alignment--. Applicant's patent must be construed in accordance with the above comments.
